MAR 15 1994

OFFICE OF THE REGIONAL ADMINISTRATOR
AF ANSAS TERMINAL IN AND TADIN
AF ANSAS TERMINAL AND TRADING NORTH LITTLE R
WHITE 100 AF CENTRAL AIRPORT ROAD
NORTH LITTLE ROCK AR 72117

The Clean Water Act Section 311 (j)(5) (CWA) as amended by 4202 (a)(5) of the Oil Pollution Act of 1990 requires an onshore facility that because of its location could reasonably be expected to cause significant and substantial harm to the environment by discharging oil into or upon the navigable waters or adjoining shorelines or the exclusive economic zone (significant and substantial harm facility) to have a facility response plan approved by the Environmental Protection Agency (EPA) prior to August 18, 1993. Further, CWA Section 311 (j)(5)(e) prohibits a significant and substantial harm facility from handling, storing or transporting oil after August 18, 1993 unless the facility plan has been approved or an extension granted by the Agency.

To date, your facility has been granted an extension. During this extension the EPA will conduct its preliminary review of your facility response plan. The information on the following pages is necessary to complete that review and provide approval for your plan. Please refer to the attached 40 CFR Part 112 Appendix G for the appropriate information necessary to complete the review of your plan.

If you have any questions regarding this matter, please FAX written comments to (214) 855-0712 or mail to:

U.S. Environmental Protection Agency, Region VI
Contingency Planning Section
P.O. Box 303
Dallas, Texas 75221-0303

If you have special circumstances, please contact me or Mike Williams at (214) 855-0711.

Sincerely,

Donald P. Smith
